

Remote Generator Monitoring

Are You Ready for Your Next Surprise Inspection?

With RemoteGP™ you are ALWAYS ready!!

- Easily print up-to-date AQMD/CARB Reports
- Eliminate time-consuming manual log entries
- Provide accurate reporting of each generator's engine run hours and more!

Plus... You can manage your Generators from anywhere

Access online reports that include:

- LOCATION
- ENGINE RUN-HOURS
- STATUS (Running or Not Running)
- CONDITION (Faults or No Faults)
- BATTERY LEVEL

RemoteGP™ is a web-based wireless monitoring solution. It can be installed on any make and model of generator. Depending on the ECU of the generator, Remote GP can monitor up to 7 different fault alerts. With each installation, you'll receive

- One Unit per generator
- Daily updates of activities (alerts are sent by text or email)
- Online access to reports by phone, computer, tablet or website
- GPS location services if your portable Generator is stolen

Call today for more information or to schedule your installation **925-229-2700**
